## **Join the CSMB petition to increase support for basic research in Canada**

8 October 2015

Dear Canadian Researcher,

The federal election campaign is a key moment in Canada's democratic process. As research scientists, we wonder why Canada's future in research, technology and innovation are not prominent among topics being discussed during the campaign. We as scientists need to change this.

La SCBM/CSMB vient de lancer une pétition pour demander plus de soutien pour la recherche scientifique. Pour avoir un effet en campagne électorale, et après auprès d'un nouveau gouvernement, nous devons obtenir beaucoup de signatures.

Make Discovery Science a National Priority by signing the following petition to increase support for basic discovery research in Canada.

<https://www.csmb-scbm.ca/advocacy/Petition.aspx>

Please forward to everyone you know. Help us effect change in Canada.

And remember - **SCIENTISTS VOTE.**

Sincerely,  
Kristin Baetz, President  
Canadian Society for Molecular Biosciences (CSMB)
